

Thank you Ronald McDonald House...

The members of our family contains of Tatiana, Oaseon, and Elijeon Pernell. Which Elijeon Pernell was a patient at the University Of Iowa Hospital in the Neonatal Intensive Care Unit. He was born on September 5, 2005. He weighed 2 pounds 8 ounces and 15 inches in length. He was born at 30 gestational weeks. He was born with immature lungs, eyes, and the ability to eat on his own. He has had equipment hooked up to him his whole life, having to receive shots almost everyday of his life, and almost everything else you can possibly think of having to deal with a premature infant. He now weighs 5 pounds 4 ounces and 17 inches in length. And the only equipment to him now is the nasal cannula tube for oxygen. But through it all God has been right by our side and we thank him!

He was a patient there since September 5, 2005 - October 20, 2005. And From September 9, 2005 - September 27, 2005 then again from October 6, 2005 - October 20, 2005 Oaseon and I was blessed to have had the privilege to stay at the RMH and meet wonderful staff and families. We thank you for the honor to have done so and to let you know that you have put a mark in our hearts that can never be replaced or removed. God bless the RMH, the staff, volunteers, and visitors. The Ronald McDonald House was sure made of true love. We thank you!

Sincerely,
The Pernell Family
